Maker: Thomas TEMPE

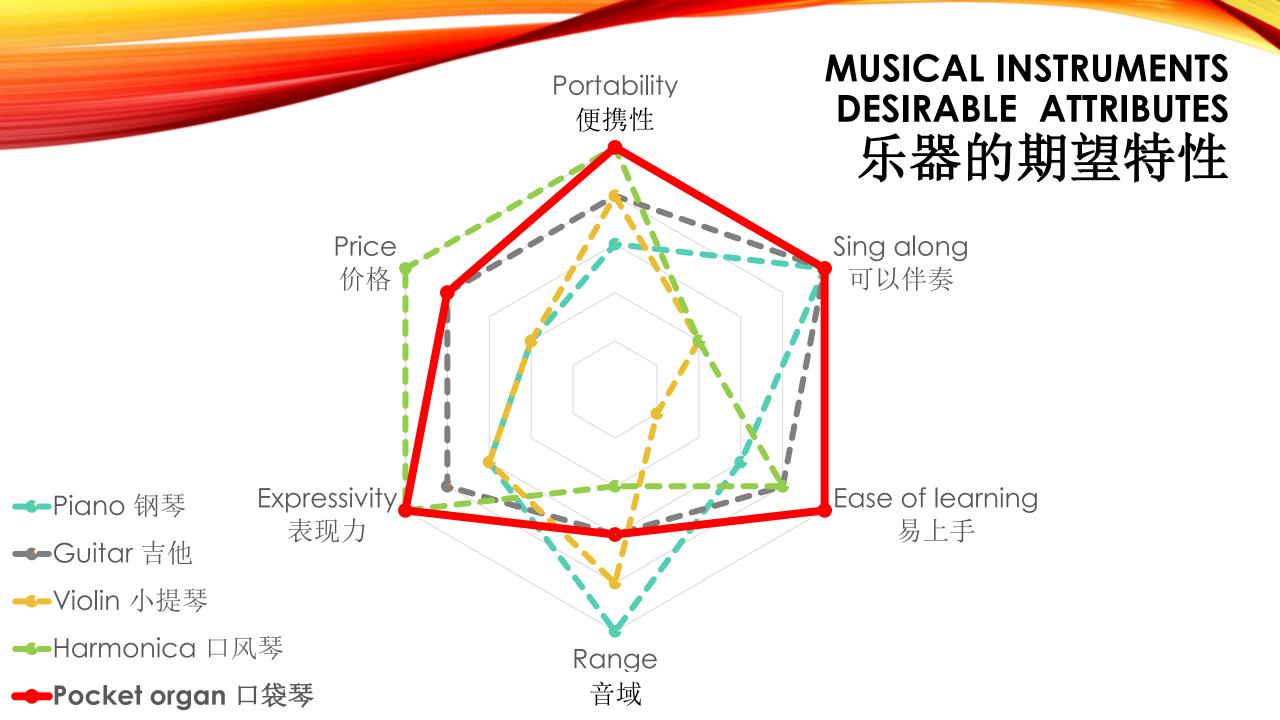

Pocket organ 口袋琴

Very few instruments are actually modern. Most of them have centuries-old user interfaces, constrained by the limits of woodworking and the need to produce sound. What if we were to design an instrument today? I want mine to fit in my pocket, be easy and fun to learn, and be expressive,

cheap, open source, and easily hackable.

实际上当下很少有乐器可以被认为是现代的,受限于几百年前的制作 工艺和材料,大部分乐器的用户界面都有着数百年的历史。 如果我们按现代的技术与人体工程设计一款乐器,它会是什么样的? 我希望它能轻松地塞在衣服口袋里, 易学好用, 有充分的表现力, 便 宜,开源,并且有容易更改的设计代码。

INSTRUMENT LAYOUT 乐器的样子

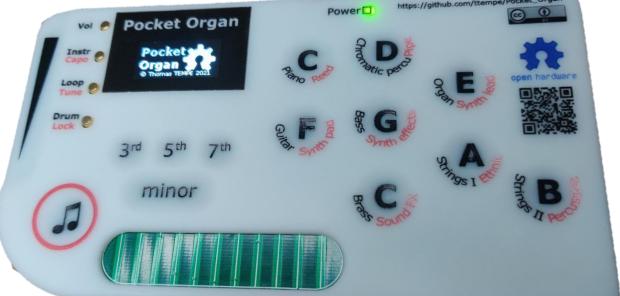

USB for MIDI & charging USB充电与MIDI接口

Display: Tells you what you're playing! 屏幕显示您现在 演奏什么

A selection of chord shapes 多种和弦可选

Headphone jack 耳机插座

Capacitive analog keyboard 压感按键

Strumming comb 弹拨梳

你让我母个明大都 变得有惠义

Bm

生命虽短爱你永远 不离不弃

Em Am Em

你是我的小呀小苹果儿

G D Bm Em

怎么爱你都不嫌多
